

MICROPILES

CHILDREN'S HOSPITAL OF PHILADELPHIA PHILADELPHIA, PENNSYLVANIA

The Children's Hospital of Philadelphia Seashore House in Pennsylvania is a medical care and rehabilitation facility for children with chronic illnesses and severe developmental disabilities. Schnabel was selected as the design/build contractor to provide (23) 80,000-pound capacity micropiles to support the new MRI for this facility.

The access was tight and the project was highly visible, but with specialized equipment Schnabel was able to give Children's Hospital a high performance specialty foundation to support their MRI.

Owner: **The Children's Hospital of Philadelphia**
General Contractor: **Turner Construction Company**
Design/Build Specialty Contractor:
Schnabel Geotechnical Design & Construction
